

Control cabinet without contactor

- Economical: The cost of the RUN contactor, shorting motor stator contactor, and brake contactor is eliminated.
- Quiet: The loudest noise sources in the system are eliminated.
- Compact: The AC drive is integrated inside to minimize the size of the control cabinet.
- Fast: Safety function circuits respond faster than contactors.
- Safe: Mutually monitored dual-channel topology has the highest safety integrity level (SIL3) for elevator safety-related programmable electronic safety systems.

Product Specifications

Cabinet Type	Model	Applicable Power Rating (kW)	Installation Method
Machine-room-less elevator control cabinet	ACE8000-W-4005-4045	5.5, 7.5, 11, 15, 18.5, 22, 30, 37, 45	Wall mounted
Machine-room elevator control cabinet	ACE8000-B-4005-4022	5.5, 7.5, 11, 15, 18.5, 22	Backplate mounting
	ACE8000-B-4005-4045	30, 37, 45	Floor mounted
